The Wanzers DEFEATED The Singer

The Williams, and
The Williams, and
The Webster,
for the reason that the WANZERS possess the following qualities, which other machines DO NOT!

1. In the F machine, the feed har works either way.
2. In the F D and E machines, half the wear of an
ordinary machine is eaved by the winder being
separated, and the machine itself not working whilst
the bobbins are being filled.
3. Though shuttle lock-sitich machines, they are assilent as a chain-stitch and consequently WILL
NOT WAKE "IHE BARY."

Consider the value of above facts.

A S FAMILY MENICINES, there has never been any preparation so reliable, as effective. A preparation so reliable, so effective, and so agreeable to take as BRISTOL'S SARSAPARILLA and PILLS. Being purely vegetable, they are saje for the most delicate, can be taken without fear in all kinds of weather, wet or dry, and at all seasons of the year. The Sarsaparilla purifies the blood and the pills tone the stomach, regulate the bowels, invigorate the liver.

Ir was not before it was quite time, that the attention of Government was called to the fact that the tobacco manufac-turing industry has been kept in a state of paralysis ever since the intended alteration of the duties was announced, and that it was impossible for merchants or manufac-turers to do anything at all till the question was settled. But when Mr. Parkes makes his inquiries in a tone of complaint, he is open to be reminded that he himself is to some extent the cause of the long delay in dealing with the Budget proposals. Mr. Rowkerson's inti-mation that he would say on Wednesday whether he intended to go on with his scheme or to abandon it, looks of course very much like an intention to do the latter, avowals of that kind are not usually made when a Minister is very much in earnest.

The situation is certainly in some respects an extraordinary one. The existing Taxasunan had gone away before the Budget was declared, and we have never had the slightest intimation as to whether or not he approved asunder from the gentleman he has succe

of these tobacco proposals. Before the House | and from some at least of the gentlemen whom

kept in a state of suspense. The late Government attempted to modify the tobacco duties, and would probably have succeeded in so doing if it had not been that the merchants and manufacturers anticipated their intentions. and took so much tobacco out of bond, that it was not worth while for the revenue purposes of that year to press the matter. Mr. Robbert with a Denominational system, pure and article that will bear and ought to bear a further alteration for a long time to come.

A SAMILY MERICIPES, there has never been may indefinitely a personal that standard. The inter-shifts (1970) SAIRAR BALLA and PILLS. Being sportly specially the year of the part of the most delicits, string and all success of the year. To stronge the part of protection to the grower.

> ALTOGETHER apart from the intrinsic merits of the amending Education Bill, the peculiar position of Mr. STUART with regard to it raises a side issue in the nature, of a constitutional question which is not likely to pass undiscussed. For general purposes it was very desirable that Mr. STULER should be made Treasurer, and he is undoubtedly the best man the Government could have laid its hands on. But then it so happens that on the Education question he is as wide as the poles

of these tobacco proposals. Before the House has had an opportunity of going into the discussion, a new Trreature is appointed, and upon him will rest the responsibility of sadopting proposals as to which it is not to be supposed he was consulted. But whether is so doing he is sitting in judgment on Mr. Forster's finance, or on Mr. Robentson's linance, may be known to him, but is not time when Mr. Struatt is coming into office, and his joining the Cabinet is exactly coknown to the public.

We have already intimated that we do not consider the scheme submitted by Mr. Roberts and insigning the Cabinet is exactly coincident with the necessity for a new educational measure. Mr. Robertson has striven to the best possible, but at the same time we should be sorry for two reasons if it is entirely withdrawn. The first reason is that it is bad for the industry itself for it to be doubt is whether the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the same to the new measure shall or shall are the new measure shall ar shall not be a further step away from the Denominational system and in the direction of that year to press the matter. Mr. ROBERT- with a Denominational system, pure and son has again proposed to deal with these tobacco duties, and even if he withdraws the creeted by its side the National system. proposal, the trade will still remain under the boards was a waste of national resources, we somer or later by some Ministry. The chiefs consolidated the two into one, at the same of each party have already by their conduct time putting Denominational schools under of each party have already by their conduct time putting Denominational schools under indicated that, in their opinion, tobacco is an certain fresh disabilities, and giving special favour to the Public schools. He prefers a National mum amount of tobacco duty fixed; and both manufacturers and growers will the know out of respect to vested interests and political available. exactly what they have got to deal with, and expediency. He has, therefore, included a tom they can go to work with a tolerably sure clause in his new measure which, if honestly Auch conviction that there is not likely to be any meant and honestly worked, would prevent the further spread of Denominational schools, and

sumption, while not imposing any restraint upon the cultivator. Of course there would posed to take advantage of them. If there is be the protection of 6d. on the colonial to be a bill at all, we think it will be a pity leaf as compared with the imported, not to incorporate in it some provision for but that is less than exists at present, where giving a further extension to the principle there is a protection of a shilling, and is still already embodied in the law as it stands. It less than would be the case were Mr. Roberts son's proposal carried out, because although passed, and the time has come for a further that proposel somewhat diminished the proshould be sorry to see the question of national education made the sport between two rival political parties; and though in the last debate something was said about Mr. PARKES out-bidding Mr. Robertson in popularity, we hope the Assembly generally will ignore the rival bids of competing politicians, and will think only of the permanent interests of the
